RAKESH MEKA

+91 9515703789 | rakeshmeka.work@gmail.com | Hyderabad, Telangana | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Scientist with **2+ years of experience in data analytics, machine learning and AI-driven solutions**. Proficient in **Python, SQL and data visualization tools** for building predictive models, analytics dashboards and scalable data pipelines. Experienced in **data preprocessing, feature engineering, exploratory data analysis and model evaluation** to solve real-world business problems. Currently working as an **Artificial Intelligence Intern at Infosys**, contributing to AI/ML model development and analytics workflows. Passionate about applying **machine learning, GenAI and cloud technologies** to generate actionable insights and support data-driven decision-making.

SKILLS

- **Programming:** Python, SQL, MySQL, Data Structures, Object-Oriented Programming (OOP)
- **Machine Learning:** Machine Learning, Feature Engineering, Model Training, Model Evaluation, Predictive Modeling, Data Preprocessing, Exploratory Data Analysis (EDA)
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow (basic)
- **Data Visualization:** Power BI, Dashboard Development, KPI Tracking
- **Data Engineering:** Data Cleaning, Data Transformation, ETL Workflows, Structured Data Processing
- **AI / GenAI:** Retrieval-Augmented Generation (RAG), LangChain, OpenAI APIs, Prompt Engineering
- **Tools & Platforms**: Git, GitHub, Jupyter Notebook, Streamlit, Docker
- **Cloud Concepts:** Basic exposure to AWS / Azure / GCP, ML deployment concepts using Flask
- **Soft Skills:** Analytical Thinking, Problem Solving, Cross-functional Collaboration, Stakeholder Communication

WORK EXPERIENCE

Artificial Intelligence Intern

Infosys, Bhubaneswar (On-site) | July 2025 – Present

- Supported **end-to-end machine learning workflows** including data preprocessing, feature engineering, model training and model evaluation using **Python and Scikit-learn**.
- Built **AI-powered analytics solutions using Python, Scikit-learn, SQL and Streamlit** enabling data-driven insights from both structured and unstructured datasets.
- Performed **exploratory data analysis (EDA)** on structured datasets to identify trends, correlations and key variables influencing model performance.
- Applied feature engineering and basic hyperparameter tuning to improve model performance and prediction accuracy.
- Assisted in building **data preprocessing pipelines** for machine learning model training using Python and Pandas to support data-driven decision-making and operational insights.
- Worked in **Agile development environments**, contributing to iterative model improvements and testing.
- Collaborated with internal teams to understand business requirements and translate them into analytical models and data insights.
- Gained hands-on exposure to version control using Git and best practices for scalable analytics workflows.

Business Development Specialist

Voltran, Hyderabad | April 2024 - Sep 2024

- Conducted **data-driven market analysis using Excel and SQL** to identify expansion opportunities for EV charging infrastructure.
- Evaluated **location-based demand patterns and operational metrics** to support strategic expansion planning.
- Prepared reports and insights for internal stakeholders to support planning and project execution.
- Coordinated with cross-functional teams and external partners to support data-driven initiatives.

Data Analyst

Hail Cabs, Hyderabad | Nov 2022 - Jan 2024

- Designed Power BI dashboards monitoring **10+ operational KPIs**, improving decision-making speed by **30%**.
- Extracted, cleaned and transformed large-scale datasets using SQL and Power Query for ETL workflows.
- Developed optimized data models, DAX measures and calculated columns for advanced reporting and analytics.
- Automated data extraction and reporting workflows, improving reporting efficiency and reducing manual effort.
- Collaborated with operations and management teams to provide data insights that improved operational performance and decision making.
- Conducted ad-hoc data analysis and prepared reports for business stakeholders within tight deadlines.

PROJECTS

GenAI Medical Knowledge Assistant (RAG Chatbot)

Tools Used: Python, LangChain, OpenAI API, FAISS, Streamlit, Pandas, Git, Docker

- Developed an **AI-powered medical knowledge assistant** using a Retrieval-Augmented Generation (RAG) pipeline to answer queries from research papers and clinical documents.
- Built a **document processing pipeline** to extract, clean and chunk PDF documents for efficient semantic search.
- Implemented **vector embeddings and similarity search** to retrieve the most relevant context before generating responses.
- Designed an **interactive web interface** that allows users to ask questions and receive contextual answers in real time.
- Improved response relevance by optimizing **retrieval strategies and prompt design** for better contextual understanding.
- Structured the project with modular code and **version control for reproducibility and scalability**.

End-to-End Machine Learning Pipeline for Disease Prediction

Tools Used: Python, Scikit-learn, Pandas, NumPy, Matplotlib, SQL, Power BI, Jupyter Notebook, Git

- Developed an **end-to-end machine learning pipeline** to predict cardiovascular disease risk using patient health and lifestyle data.
- Performed **data preprocessing and feature engineering**, including handling missing values, encoding categorical variables and scaling features.
- Conducted **exploratory data analysis (EDA)** to identify key health indicators influencing disease risk.
- Trained and evaluated multiple machine learning models and selected the best-performing model based on **accuracy, precision and recall**.
- Built visualizations to analyze **feature importance and prediction insights** for better interpretability.
- Created a **dashboard to present model results and health risk trends** for easier understanding by non-technical users.

Hail Cabs – Real-Time Operations & MIS Analytics Dashboard

Tools Used: Power BI, SQL, Advanced Excel, Data Modeling

- Designed and developed a **real-time operations and MIS analytics dashboard** to monitor fleet performance and support data-driven decision-making.
- Built **interactive Power BI dashboards** to track key operational metrics such as driver earnings, revenue generation, trip volume, trip duration, acceptance time and pickup/drop-off locations.
- Extracted and transformed **large operational datasets using SQL and Advanced Excel**, ensuring high data quality and consistency for reporting.
- Automated **data extraction and reporting workflows**, enabling near real-time updates for daily and weekly MIS reports.
- Reduced manual reporting effort by **~60% through automated dashboard reporting and standardized data models**.
- Collaborated with **operations and business stakeholders** to gather reporting requirements and translate them into actionable analytics dashboards.

KEY ACHIEVEMENTS

- Reduced manual reporting workload by **60%** through automated analytics dashboards.
- Built **RAG-based GenAI chatbot using LangChain and OpenAI APIs** for semantic knowledge retrieval from medical research documents.
- Developed **ML pipeline for disease prediction**, improving classification performance using feature engineering and model tuning.

CERTIFICATIONS

- Infosys Certified Python Associate
- Infosys Certified Machine Learning Professional
- Infosys Certified Professional - Generative AI for All
- Data Analysis Using Python – IBM
- Meta Data Analyst Professional Certificate

EDUCATION

Bachelor of Technology (B.Tech)
Electronics & Communication Engineering
SRK Institute of Technology | 2018 - 2022
